# about ricardo kondo

ricardo kondo is a Mexico City-born, Ibiza-based music producer, DJ, and composer whose work bridges the sacred and the sonic. With over 15 years of experience in the music industry and a degree from Berklee College of Music (Class of 2010), his artistry moves effortlessly between emotive electronic production, cinematic storytelling, and dancefloor alchemy.

Kondo's sound is rooted in deep feeling—crafted from a place where melody meets memory. His musical palette blends elements of melodic house, melodic techno, and a touch of disco, all infused with a timeless emotional depth. Through each set and composition, he invites listeners into an intimate journey—one that awakens the senses and stirs the soul.

As one half of Mariaxibit, a celebrated project with millions of digital plays, and a solo artist signed to labels like Happy Camper Records, The Gardens of Babylon Records, and Serafin Audio Imprint, Kondo's music has touched hearts across the globe. His live performances have become portals of collective transformation, gracing stages such as The Gardens of Babylon (Amsterdam), Zamna (Tulum), Akasha (Ibiza), Mia (Tulum), Cafe del Mar, Where the Sheep Sleep, Radion (Amsterdam), Dutch Burn Decompression, and AfrikaBurn.

At AfrikaBurn 2025, Kondo experienced what he calls the most magical set of his life—while playing one of his own productions, a double rainbow arched over Tankwa Town, transforming the desert into a cathedral of light and sound. It was a moment of synchronicity and awe that etched itself into the hearts of everyone present, a testament to music's power to align heaven and earth.

Guided by the mantra: “Take my hand and let's go for a ride—I may not blow your mind, but I will definitely touch your heart,” Kondo approaches every set as a ceremony. His music is more than entertainment—it is an offering, a shared breath between artist and audience, a space to feel, heal, and remember who we are beneath the noise.

# Technical Rider

## 1. PERFORMANCE SETUP

- DJ Mixer: Pioneer V10 Mixer (preferred) or Pioneer A9 (Important: make sure the mixer is also linked via Pro DJ Link).
- CDJs: 3 × Pioneer CDJ-3000 (latest firmware, linked via Pro DJ Link)
- At least one available channel on Mixer (for optional instruments).
- 4 European electrical outlets.

## 2. MONITORING

- 2 × 12" or 15" monitors, one on each side of the mixer, and a subwoofer when possible.
- Booth monitor volume control from Dj mixer required.
- 

## 3. ADDITIONAL NOTES

- Setup/soundcheck time: 30–60 mins before doors
- Artist may bring personal gear (controllers, drum machines, guitar, synths)
