c) $R = 1\frac{1}{2} D$

d) $R = 2 D$

HISTORY

Tanit, the goddess revered in ancient Ibiza and beyond, personifies motherhood, fertility and spiritual guidance. She is portrayed as a motherly figure with outstretched arms and a lunar headdress on her forehead.

Associated with the moon and the cosmos, she also holds a key that suggests her role in the transition between life and death. Tanit is a symbol of protection and connection with the divine, with strong maritime ties that connect her to the ocean and navigation. Her presence transcends time, enriching the island's history and spirituality.

THE SCULPTURE

This impressive sculpture represents an imposing figure of an ancient deity whose legacy is linked to the threads of the ancient history of Ibiza and beyond, revealing a goddess whose attributes and symbols are rich in meaning.

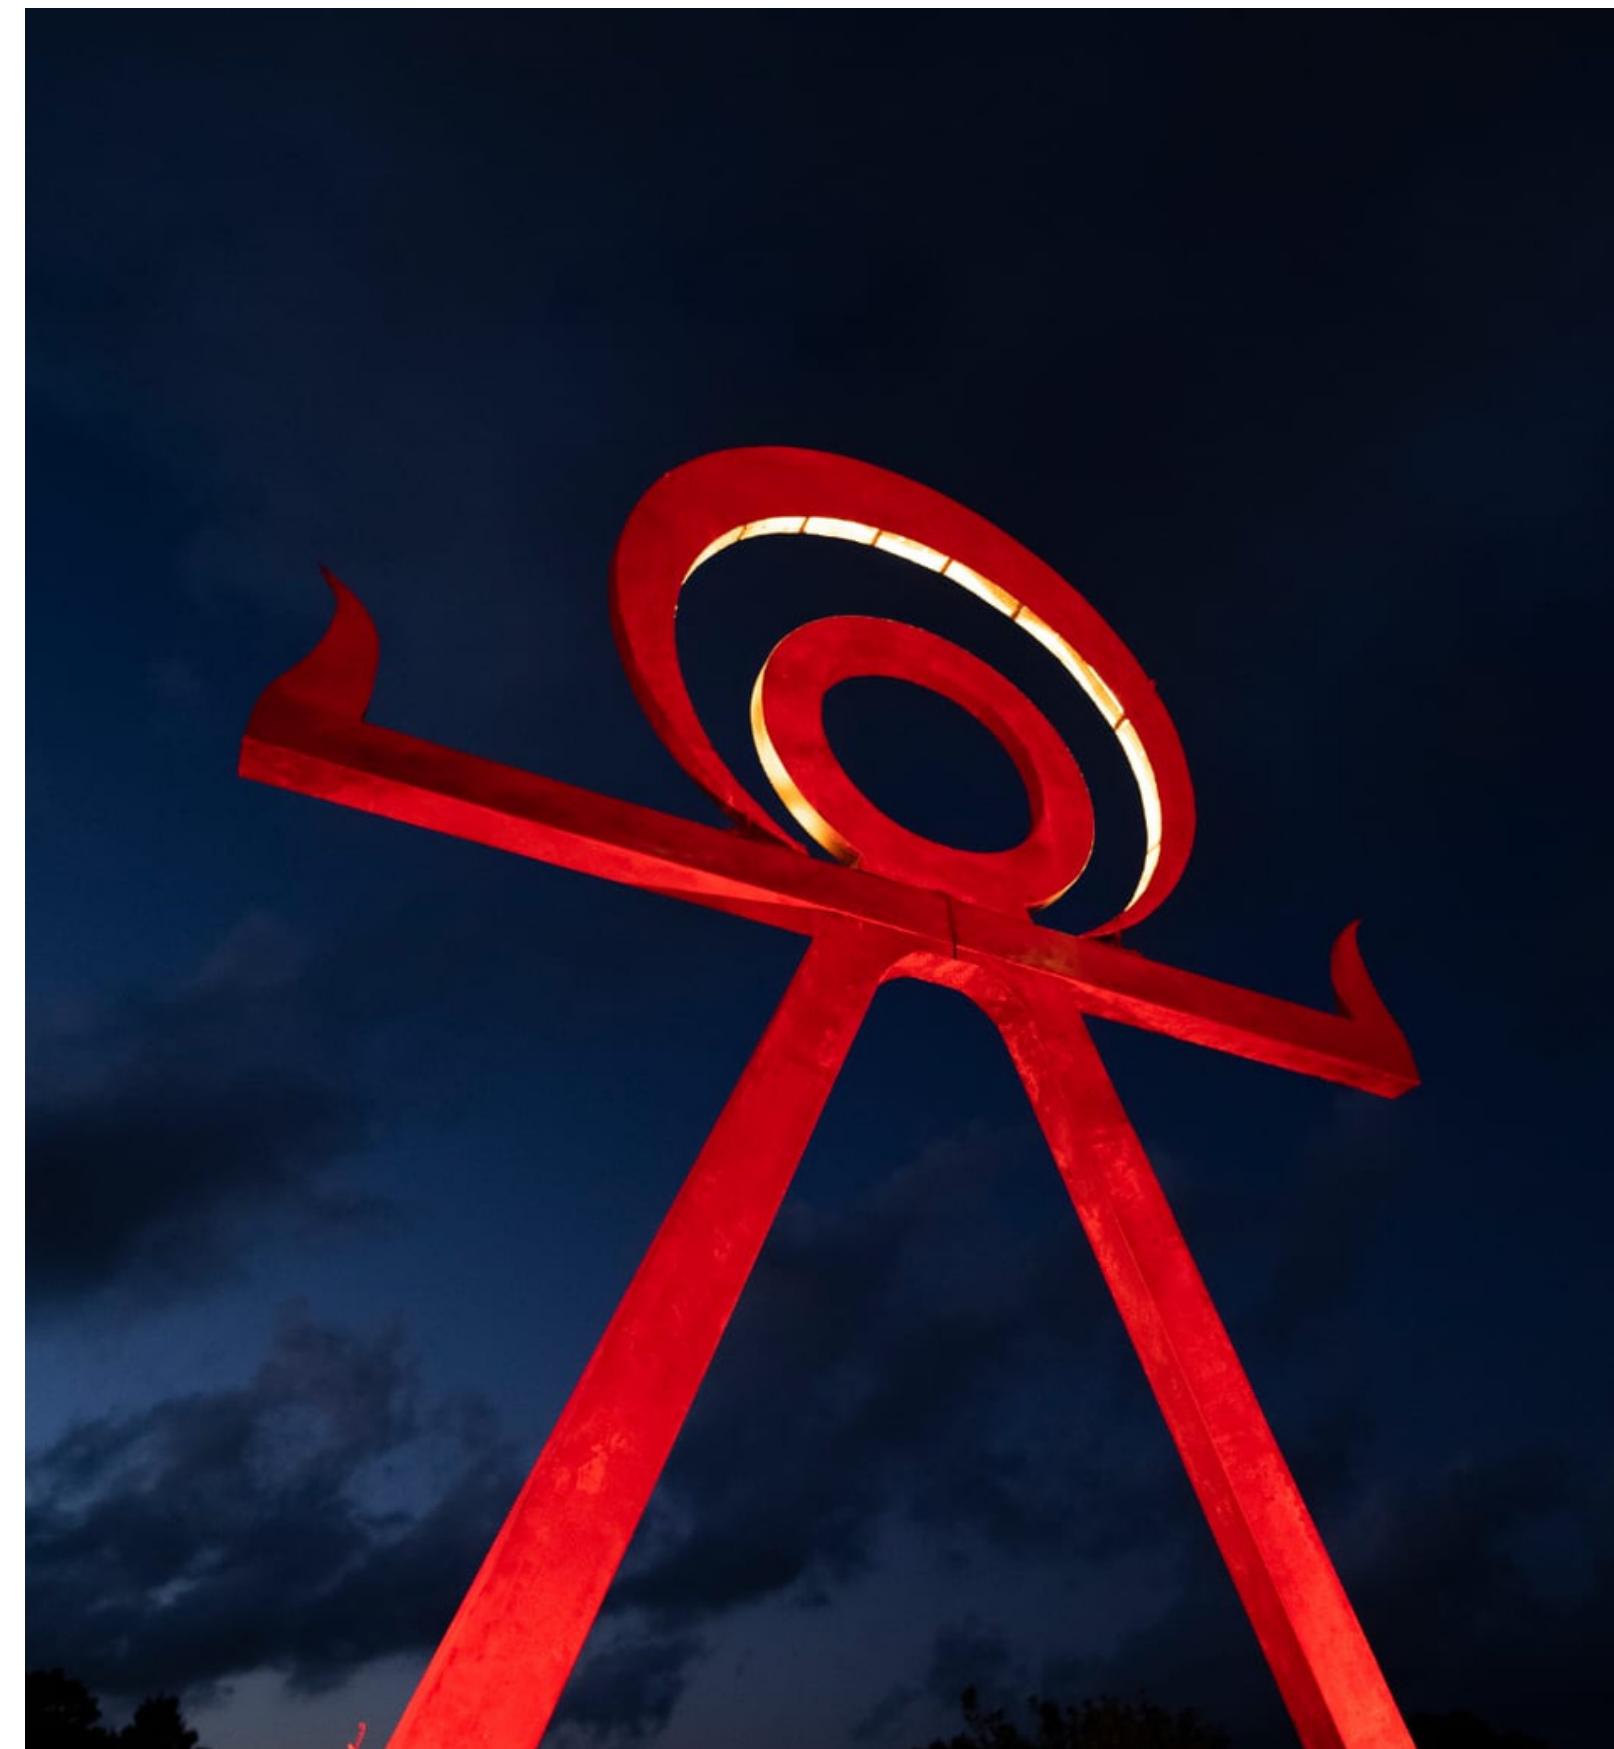

This goddess, full of wisdom and compassion, transcends time and the veils of reality, connecting the earthly world with the celestial spheres.

The sculpture is more than an artistic representation, it is a portal to an ancient time, where beliefs and divinities were woven into the daily life of humans.

Tanit, the goddess of fertility, motherhood and the cosmos, a spiritual guide, lives on in this work, a bridge connecting us with the past and the history of Ibiza...

This figure has been designed to be used as an altar in ceremonies, rituals or events. It can also be a portal of entry to a place or a transition point between spaces.

PEDRO A. PEREZ

Pedro is an artist whose skilled hands bring metal to life with unwavering passion. In his workshop, fire and force combine to shape his visions: iron comes to life, curving and twisting into organic or geometric shapes that seem to defy the very nature of the material.

The Tanit sculpture is a visual narrative of his passion, perseverance and technical skill, an invitation for the viewer to explore and immerse themselves in the fusion of art and metal that he has masterfully created.

A close-up, low-angle shot of a thick, rusted metal beam, likely part of a bridge or industrial structure. The beam is dark brown with a rough, textured surface. It runs diagonally from the bottom left towards the top right. The background is a clear, bright blue sky with some light, wispy clouds visible in the distance.

TECHNICAL DETAILS

DIMENSIONS

5,5m high x 3m wide

Base 3m x 1 (2.20m with the central walkway)

MATERIALS

Steel sheet cut 1.5mm

Quality screws 8,8 M – 16

Base made of a 40 x 40 x 2mm structural tube

ASSEMBLY

·Assembly time 4h

Due to security measures, the sculpture has 4 mooring points (the best and closest options will be located)

Access to an electric outlet is necessary to illuminate the piece

RENTAL PRICE
